EDUCATION

University of Lagos - Lagos, Nigeria. **Completed: August 2025**

Programme: BSc, Chemistry

Relevant Courses: Analytical chemistry, Environmental chemistry, Atomic Spectroscopy

PROFESSIONAL SUMMARY

Impact-driven Chemistry graduate blending scientific precision with technological innovation. Brings hands-on experience in laboratory analysis, quality control, and regulatory compliance from internships at leading research and regulatory institutions. Skilled in conducting accurate analyses, interpreting complex data, and upholding stringent safety and quality standards. Combines laboratory expertise with web development capabilities to create creative, data-driven solutions for real-world challenges. Passionate about leveraging science and technology to tackle pressing sustainability and efficiency challenges.

WORK EXPERIENCE

Laboratory Intern, National Agency for Food and Drug Administration and Control August 2024 - October 2024

- Analyzed over 30 pharmaceutical samples to verify compliance with national drug safety and efficacy standards.
- Performed laboratory tests including gravimetry, pH testing, titrimetry, and UV/Vis spectrometry to assess drug purity and potency.
- Documented experimental procedures and test results with precision, contributing to regulatory reports and quality control records.
- Collaborated with senior analysts to review and interpret drug safety regulations, deepening understanding of compliance requirements in the pharmaceutical sector.

Intern, Nigerian Institute of Medical Research July 2023 - October 2023

- Conducted 50+ diagnostic tests (malaria RDT, blood grouping, genotype, ESR) to support clinical and research activities.
- Operated laboratory equipment including biochemistry analyzers to perform full blood count and lipid profile assessments.
- Collected and recorded patient vitals for over 50 individuals weekly, improving efficiency in the Clinical Diagnostics Department.
- Contributed to research projects on malaria and nutrition, assisting in data collection and preparation for departmental reports.
- Attended multiple professional seminars on medical research, diagnostics, and public health, enhancing industry knowledge and networking with field experts.

RESEARCH

Project- Synthesis of Zeolites & Nanocomposite Preparation from Agricultural Waste

- Investigated cost-effective synthesis methods of zeolites from locally available materials, characterized their properties, and evaluated their potential as carriers for controlled-release nanofertilizers.

LEADERSHIP EXPERIENCE

Temi Foundation (NGO), Lagos State March 2023 - Present

- Participate in mentorship programmes that offer guidance and a safe space for young girls.
- Engage in community outreach initiatives addressing social issues, including sensitization programs for adolescents.
- Contribute to environmental sustainability through regular community cleanups.
- Coordinated logistics and publicity, boosting event participation and engagement by over 30%.

CERTIFICATIONS

- Codar Academy – Front-End Web Development (2025)
- ALX – Foundational Skills (2024, 3 months)
- Power Learn Project – Software Engineering Scholarship (2023, 3 months)

SKILLS AND INTEREST

Technical Skills: Intermediate in Microsoft Office suite, Google Workspace, Laboratory Analysis Techniques, Front-End Web Development (HTML, CSS, JavaScript, React).

Soft Skills: Leadership, Teamwork and Problem- Solving, Attention to Detail, Communication.

Interests: Scientific research, Green Chemistry, Sustainable Innovation, Technology Integration, and Continuous learning.
